

BRAUN

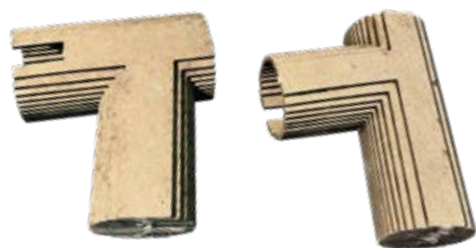

portable hairdryer concept

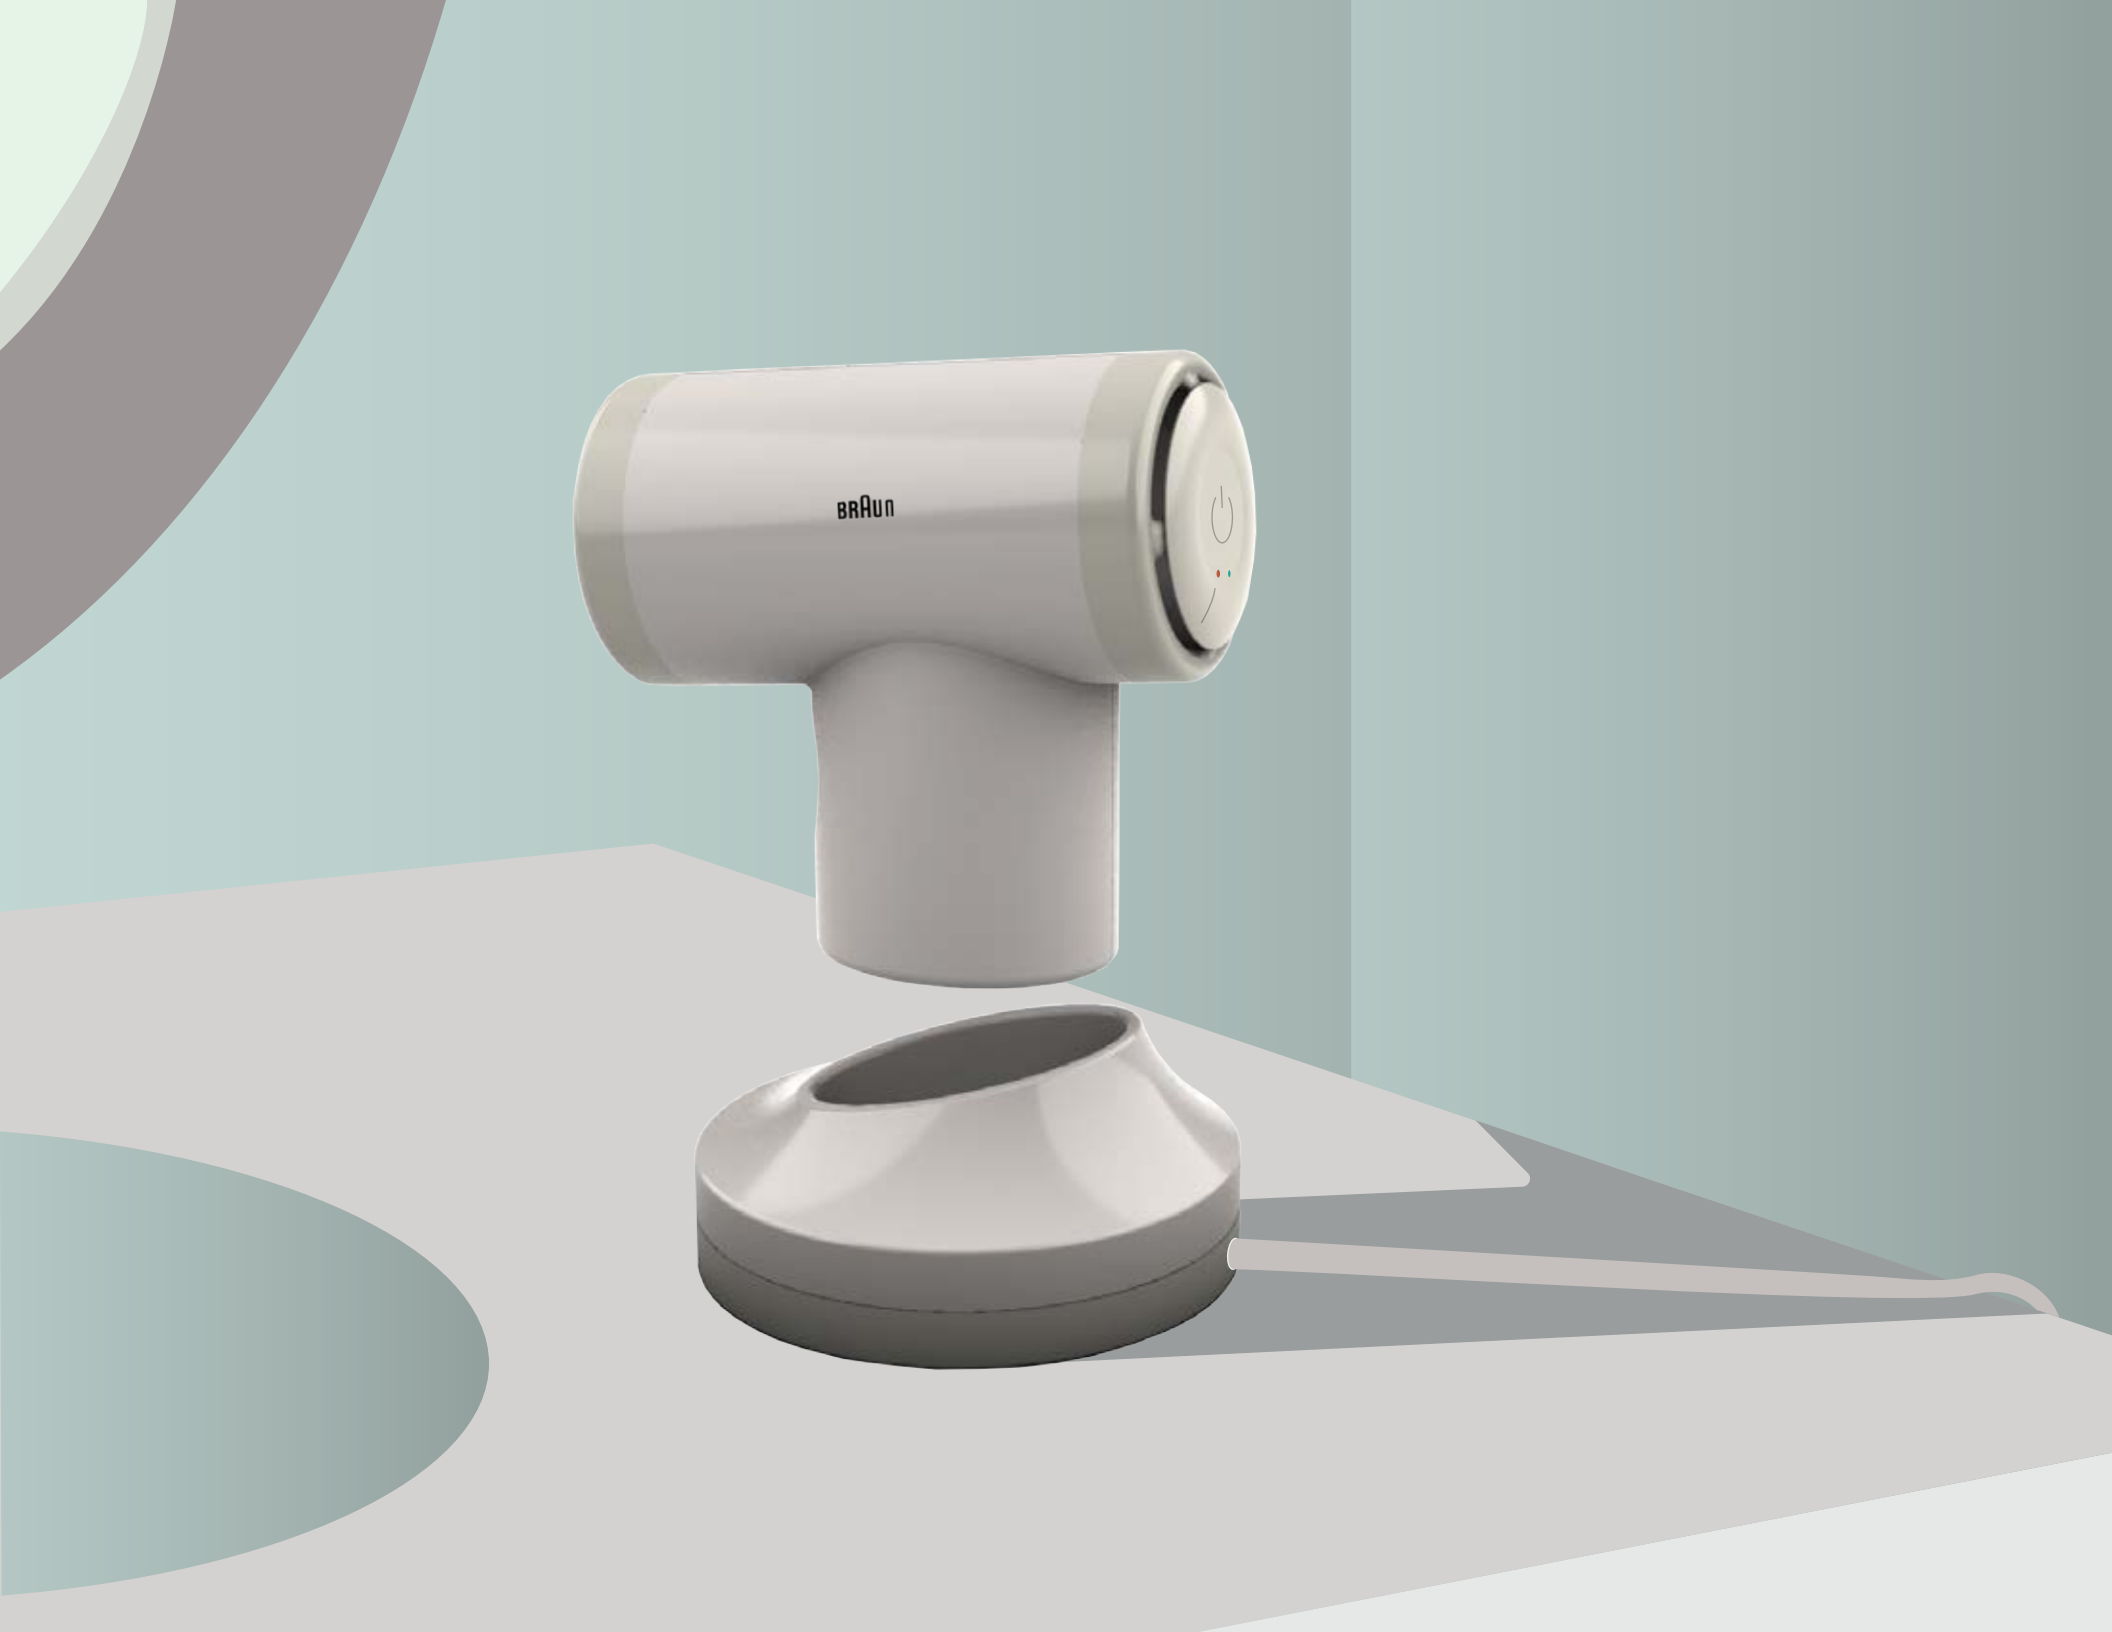

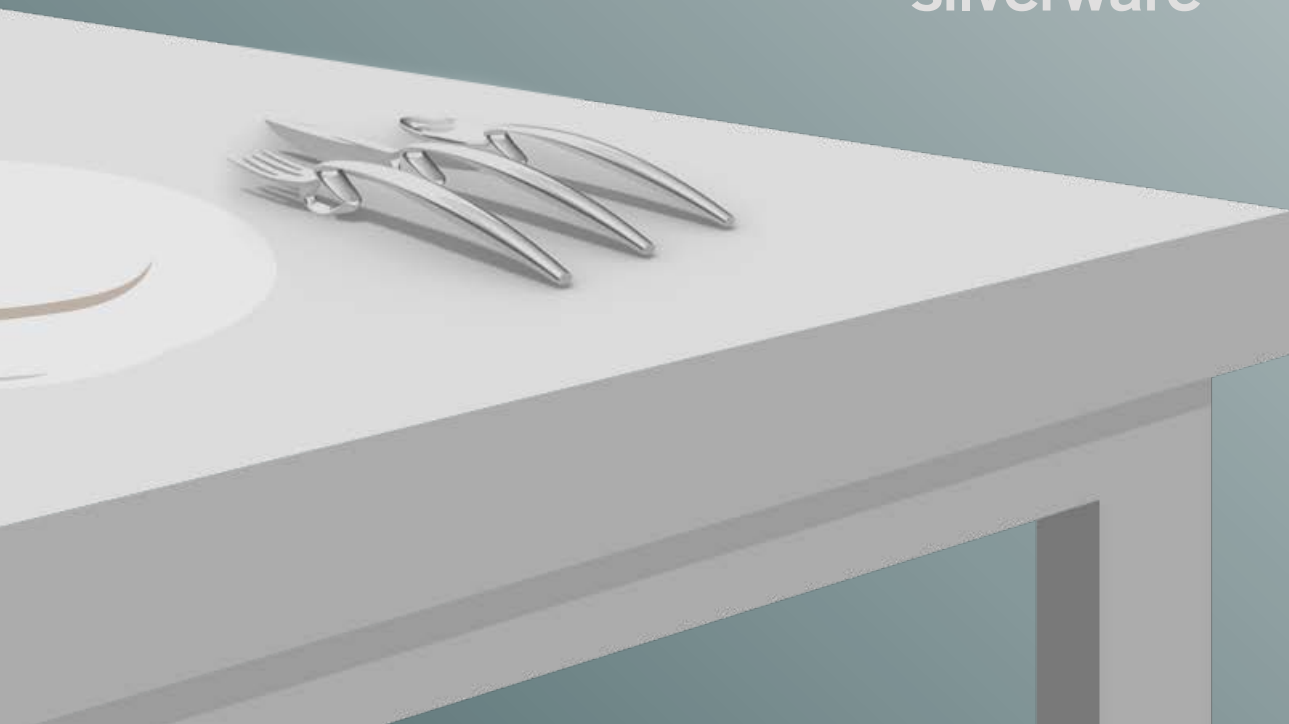

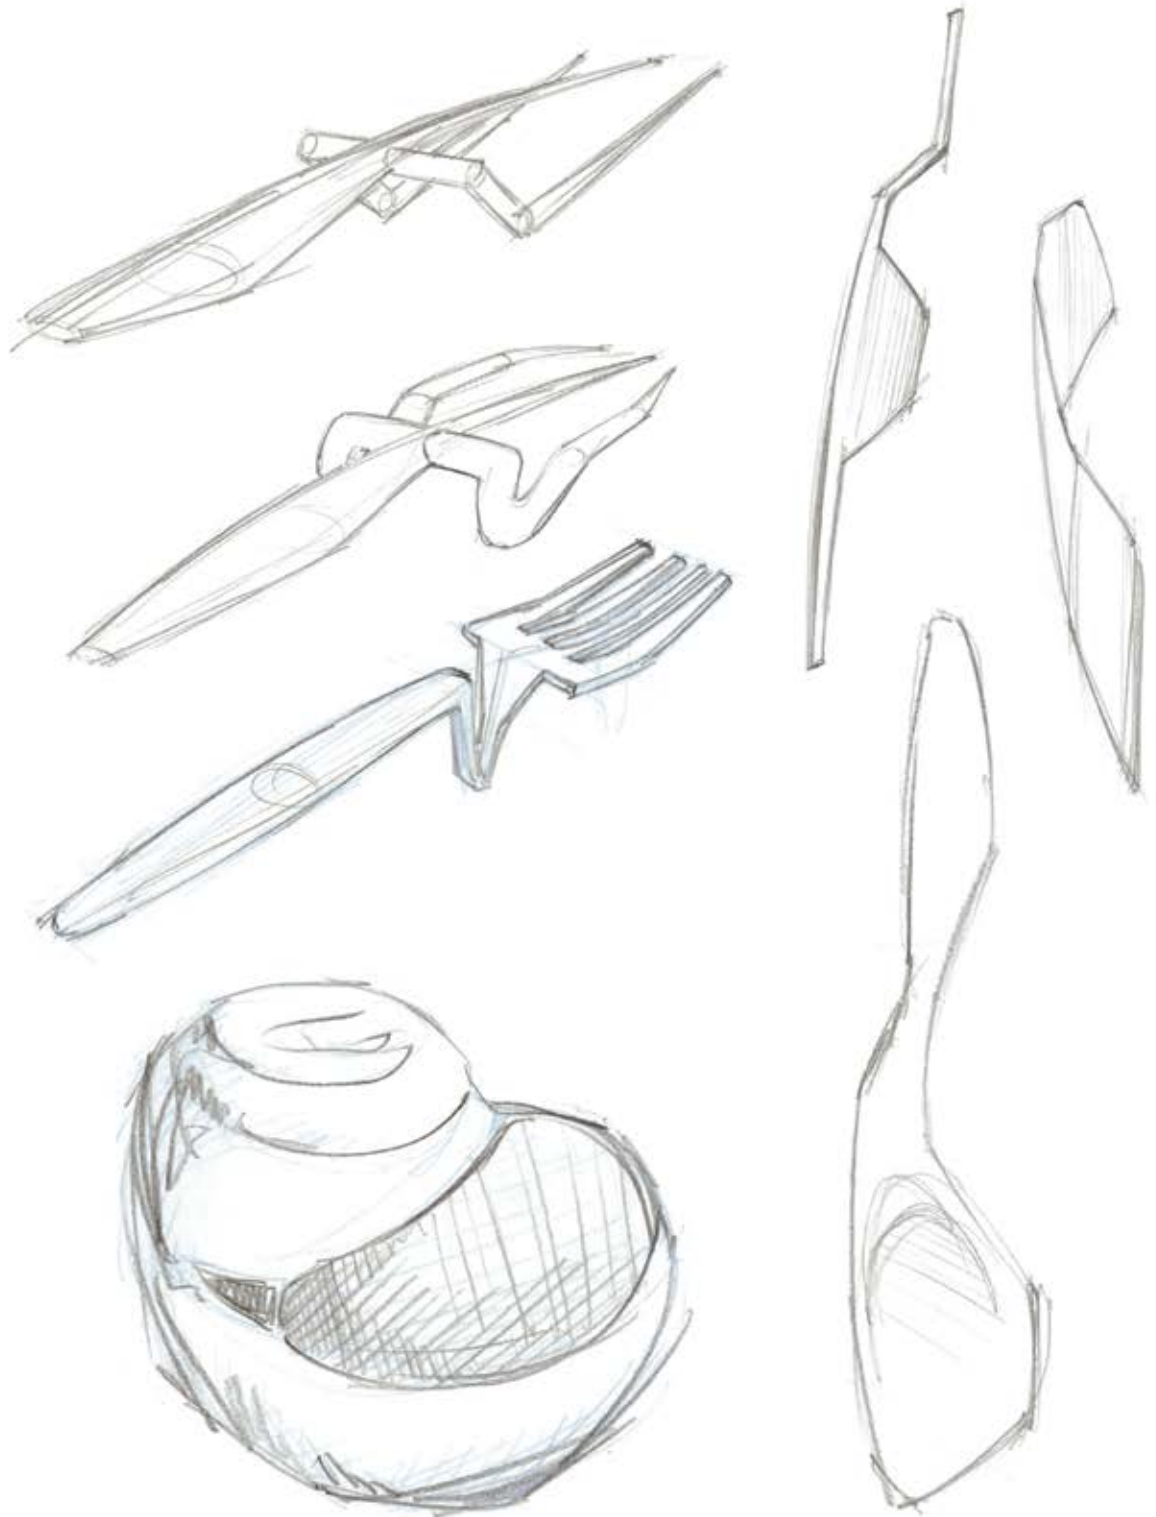

CROOK

silverware

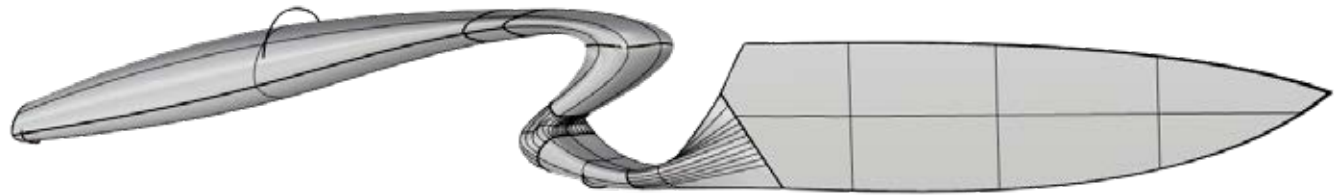

A silverware set that eliminates food contact between the utensils and table allowing them to remain in use throughout the duration of multiple courses. Intended for environments such as fine-dining restaurants and first-class flights.

Cast from metal and polished with the potential for custom textures and finishes.

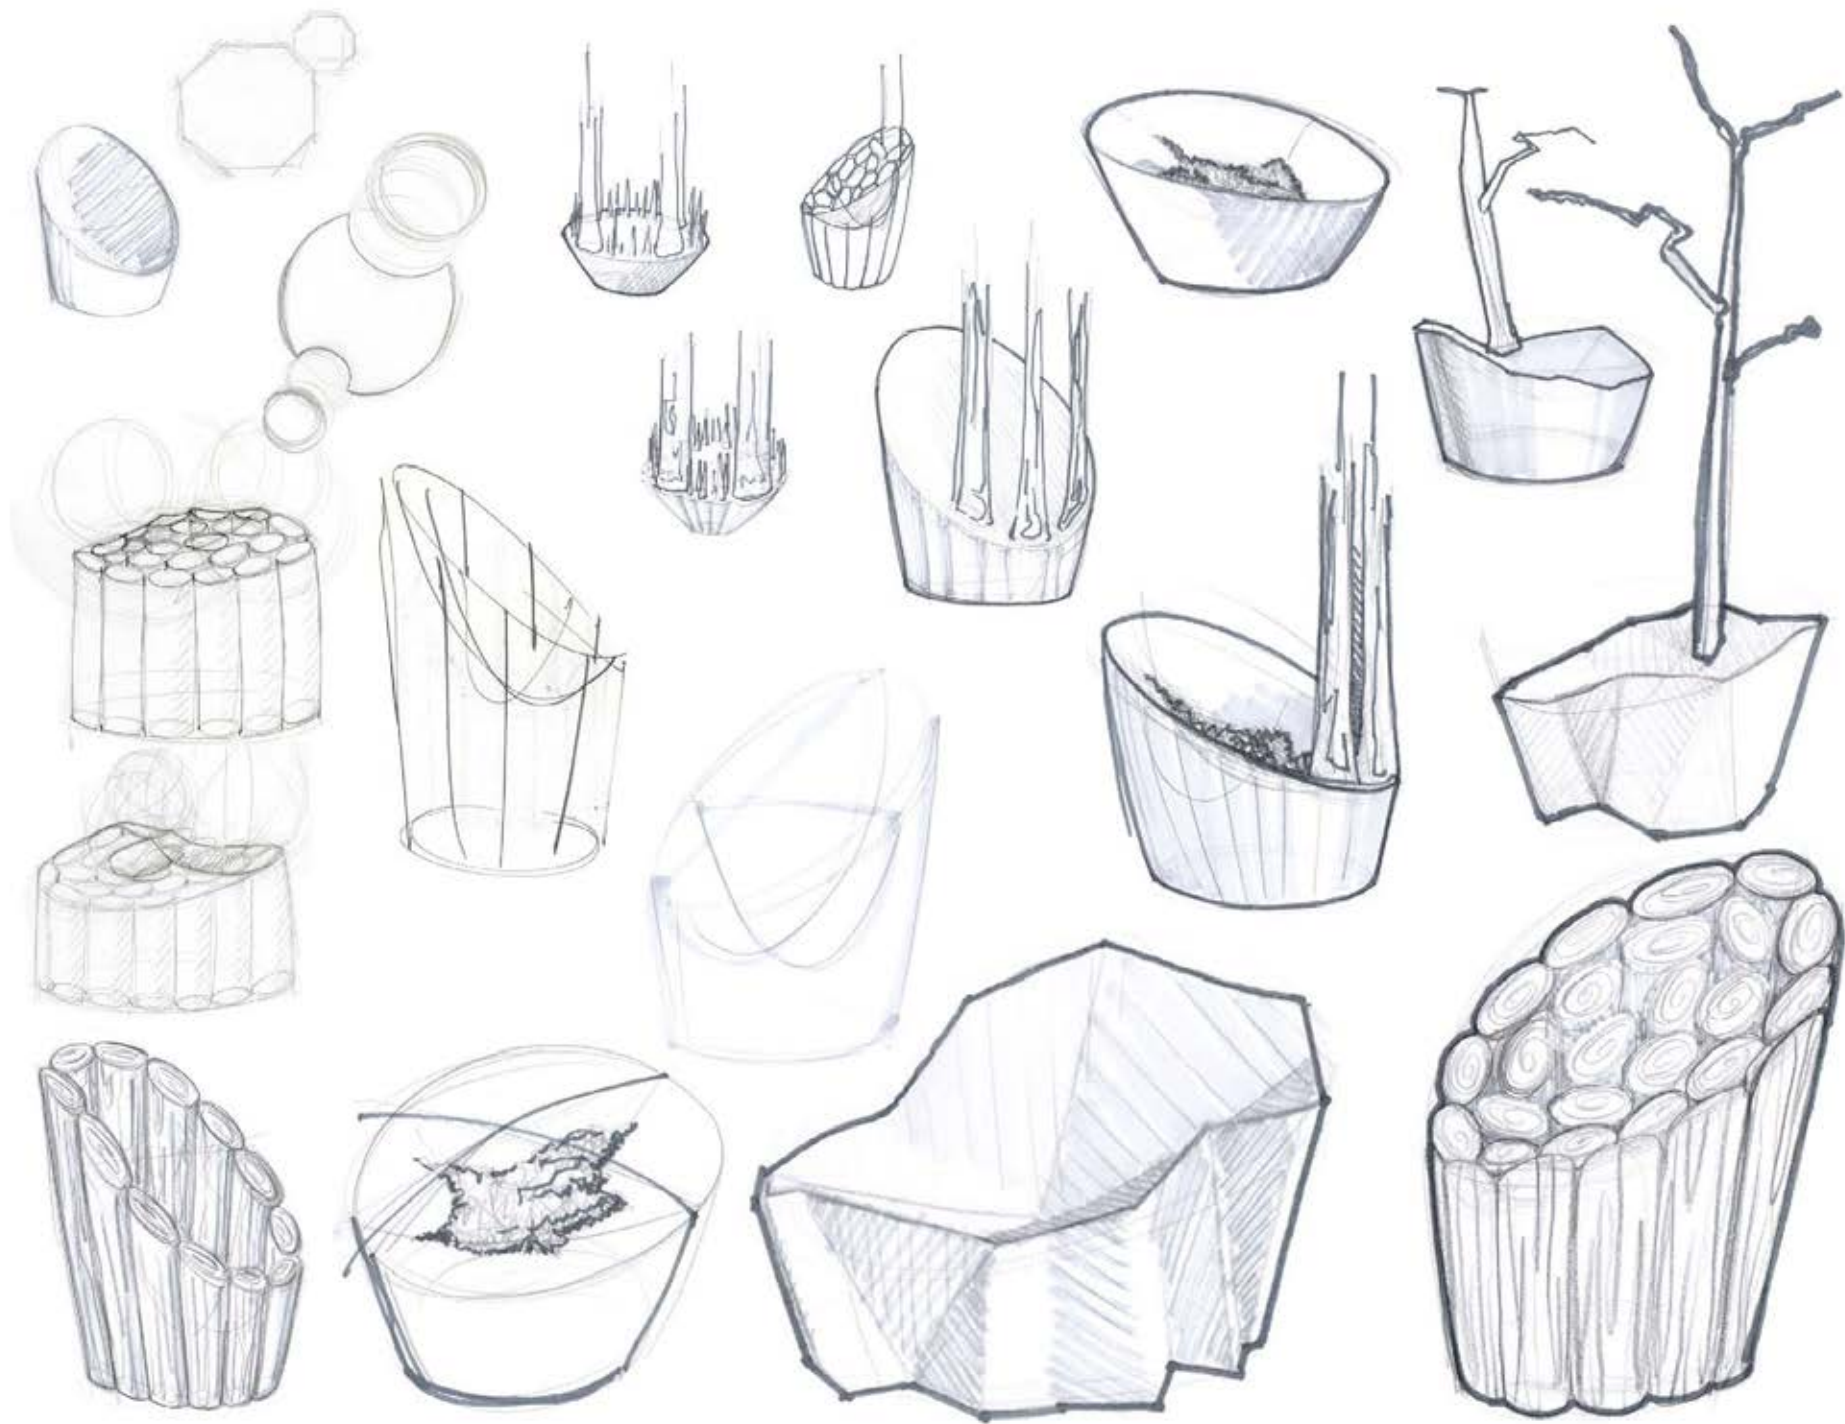

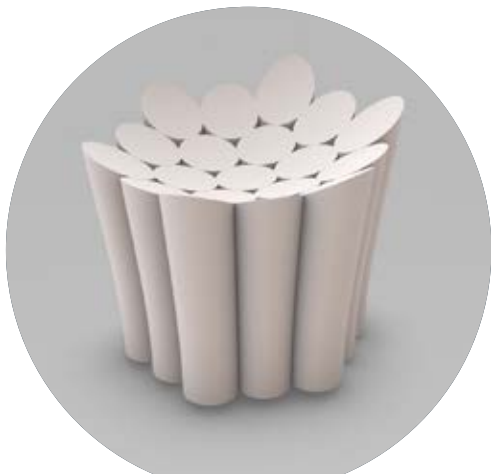

The image is a black and white line drawing of a modern architectural structure. It features a series of vertical, cylindrical columns that support a canopy. The canopy is composed of numerous overlapping, circular or semi-circular panels, each with a grid-like pattern of lines. The structure is set against a plain, light gray background. The overall style is minimalist and geometric.

TRUNK

countertop vessel

A kitchen countertop vessel for production through printed clay with a variety of presentation methods useful for herbs, utensils, flowers, fruits, and vegetables.

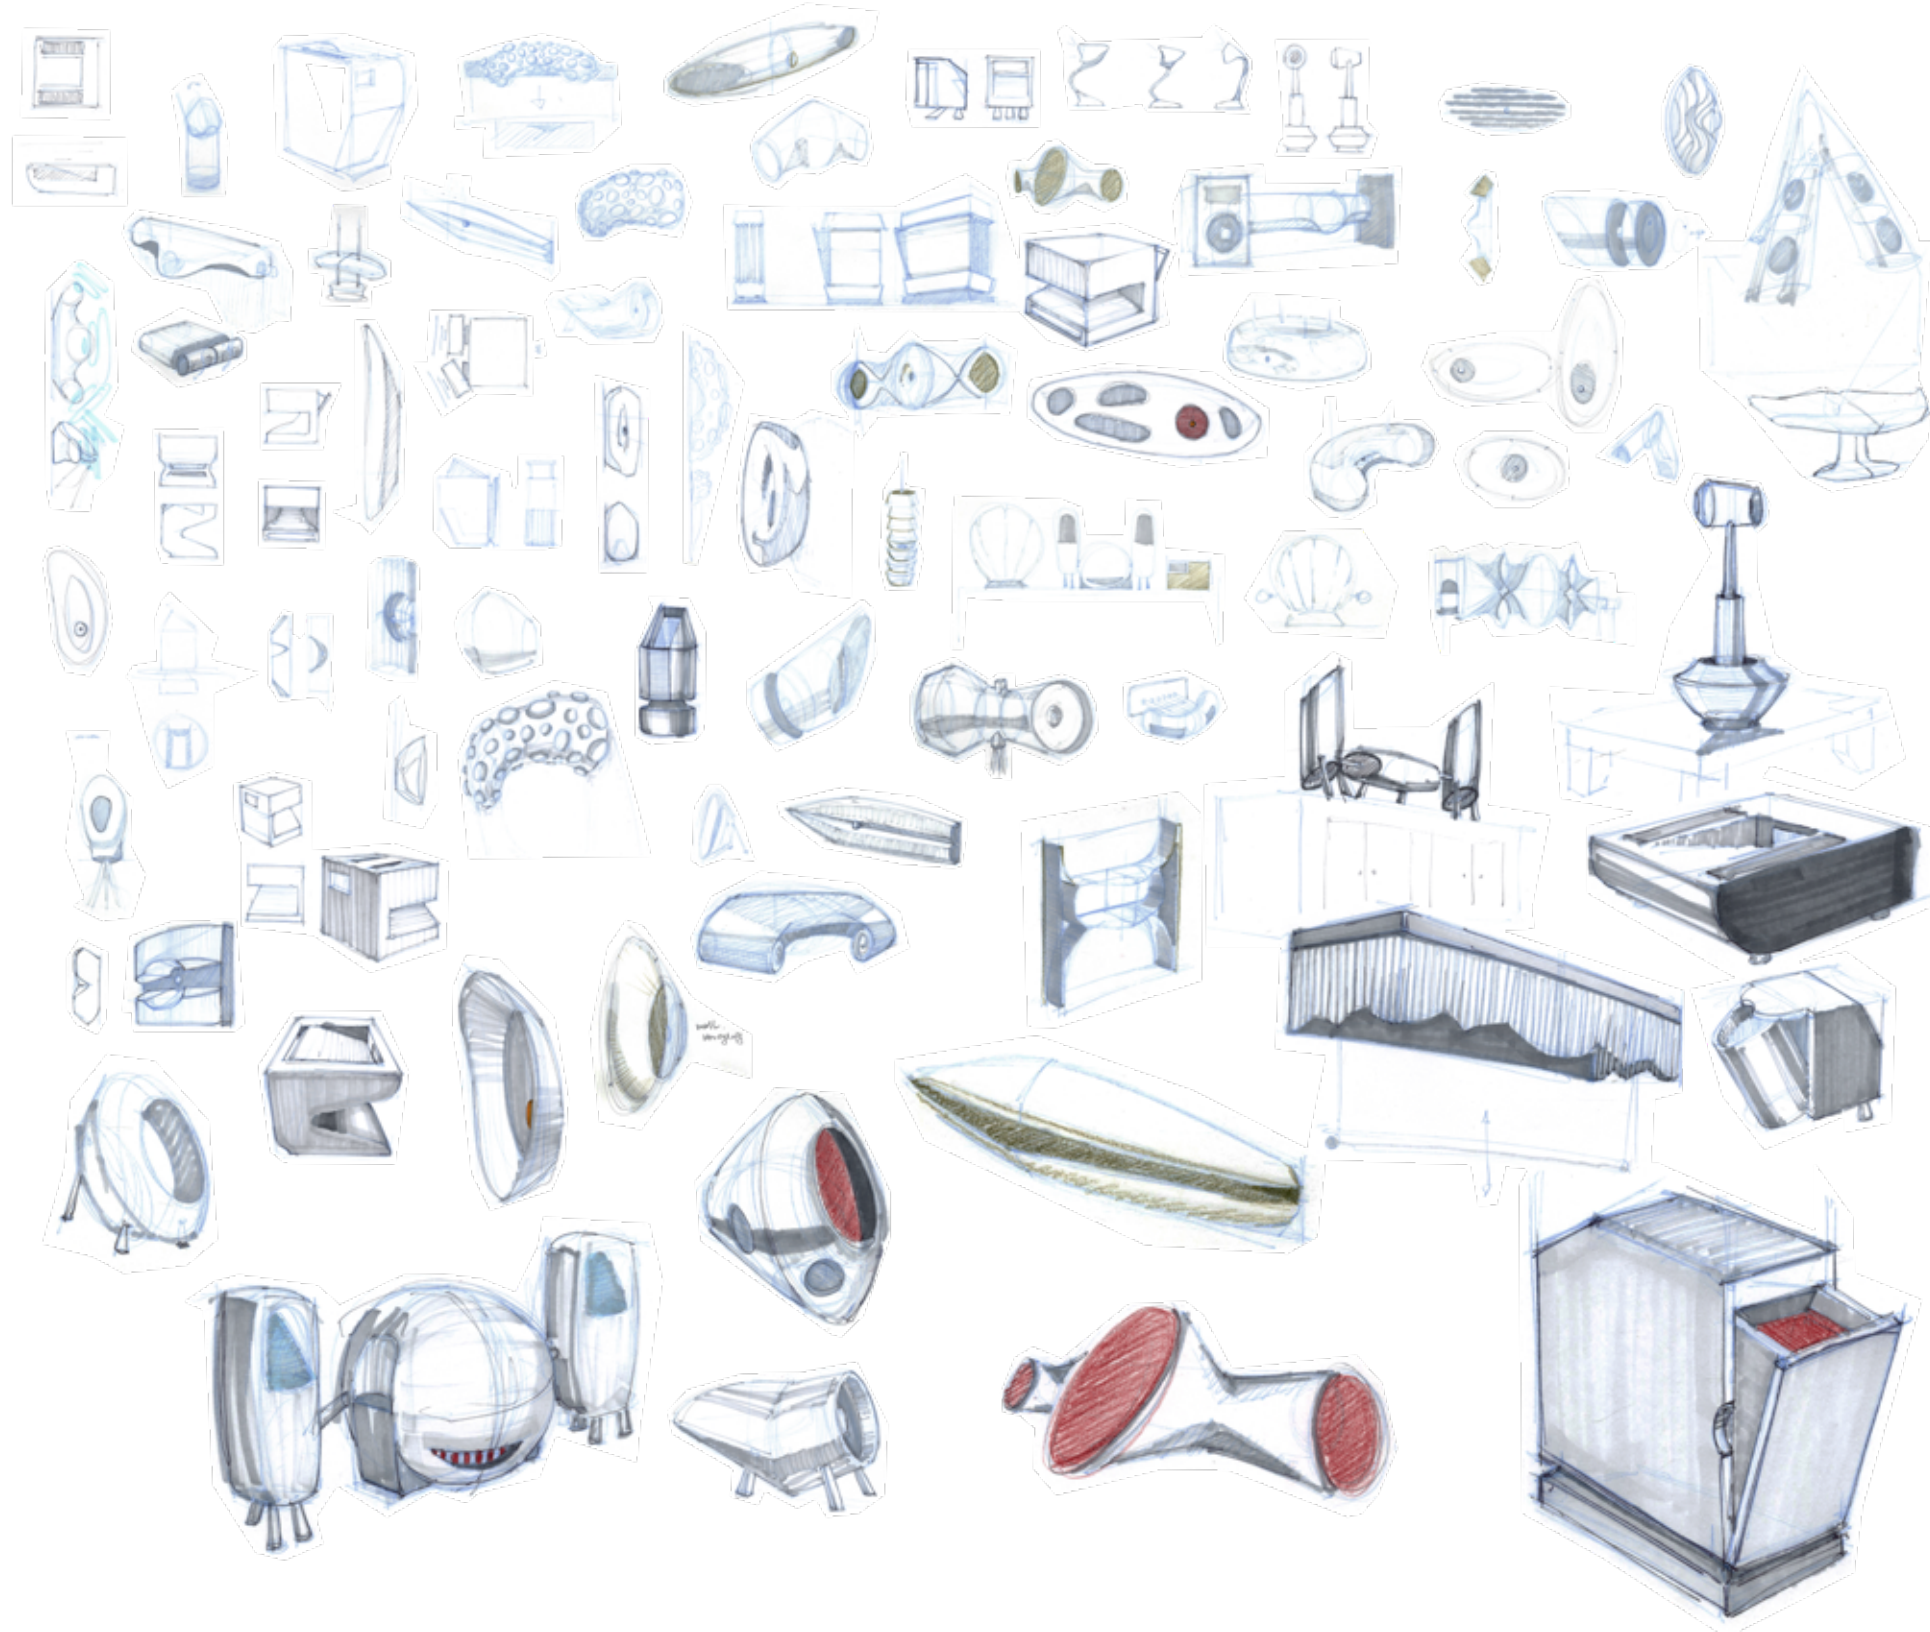

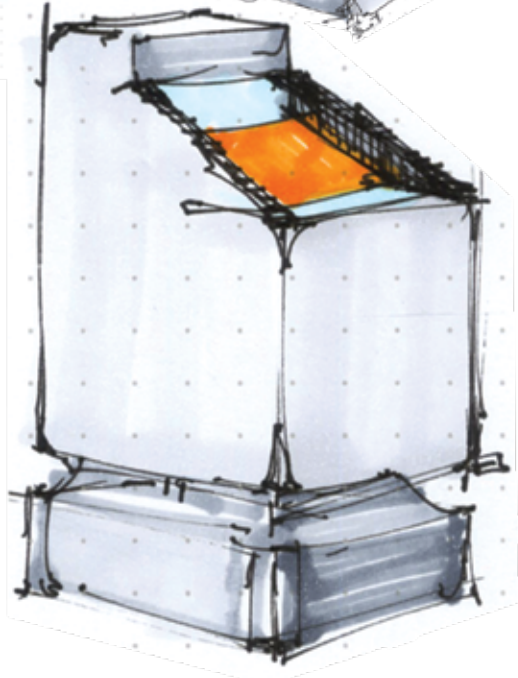

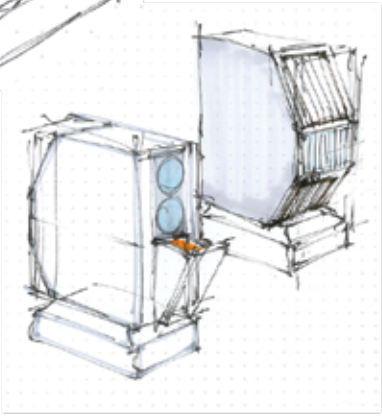

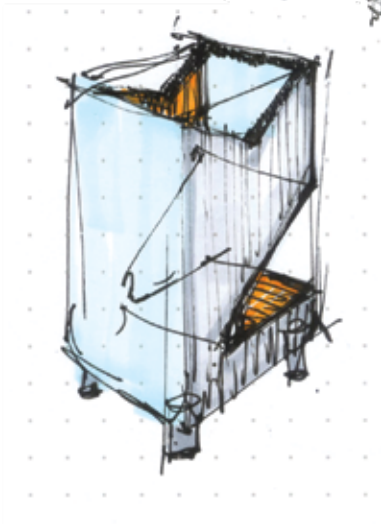

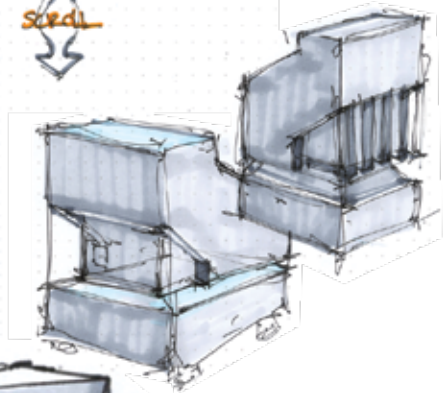

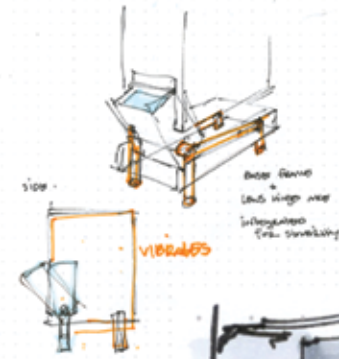

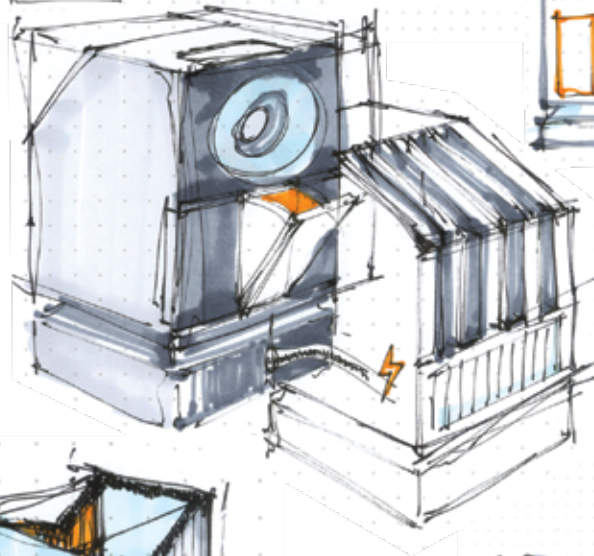

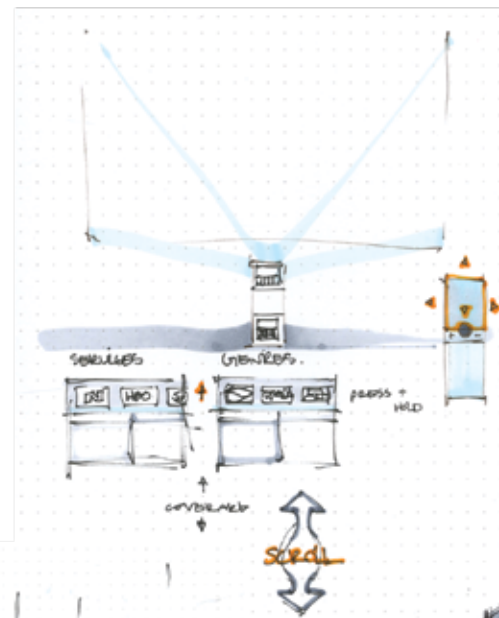

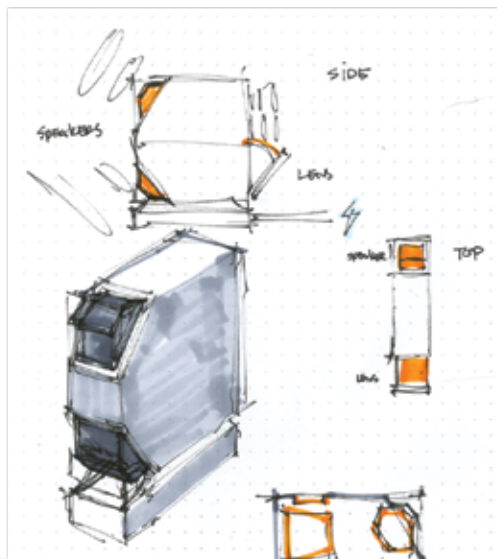

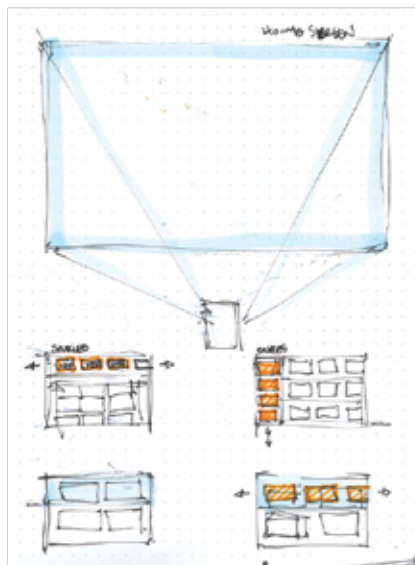

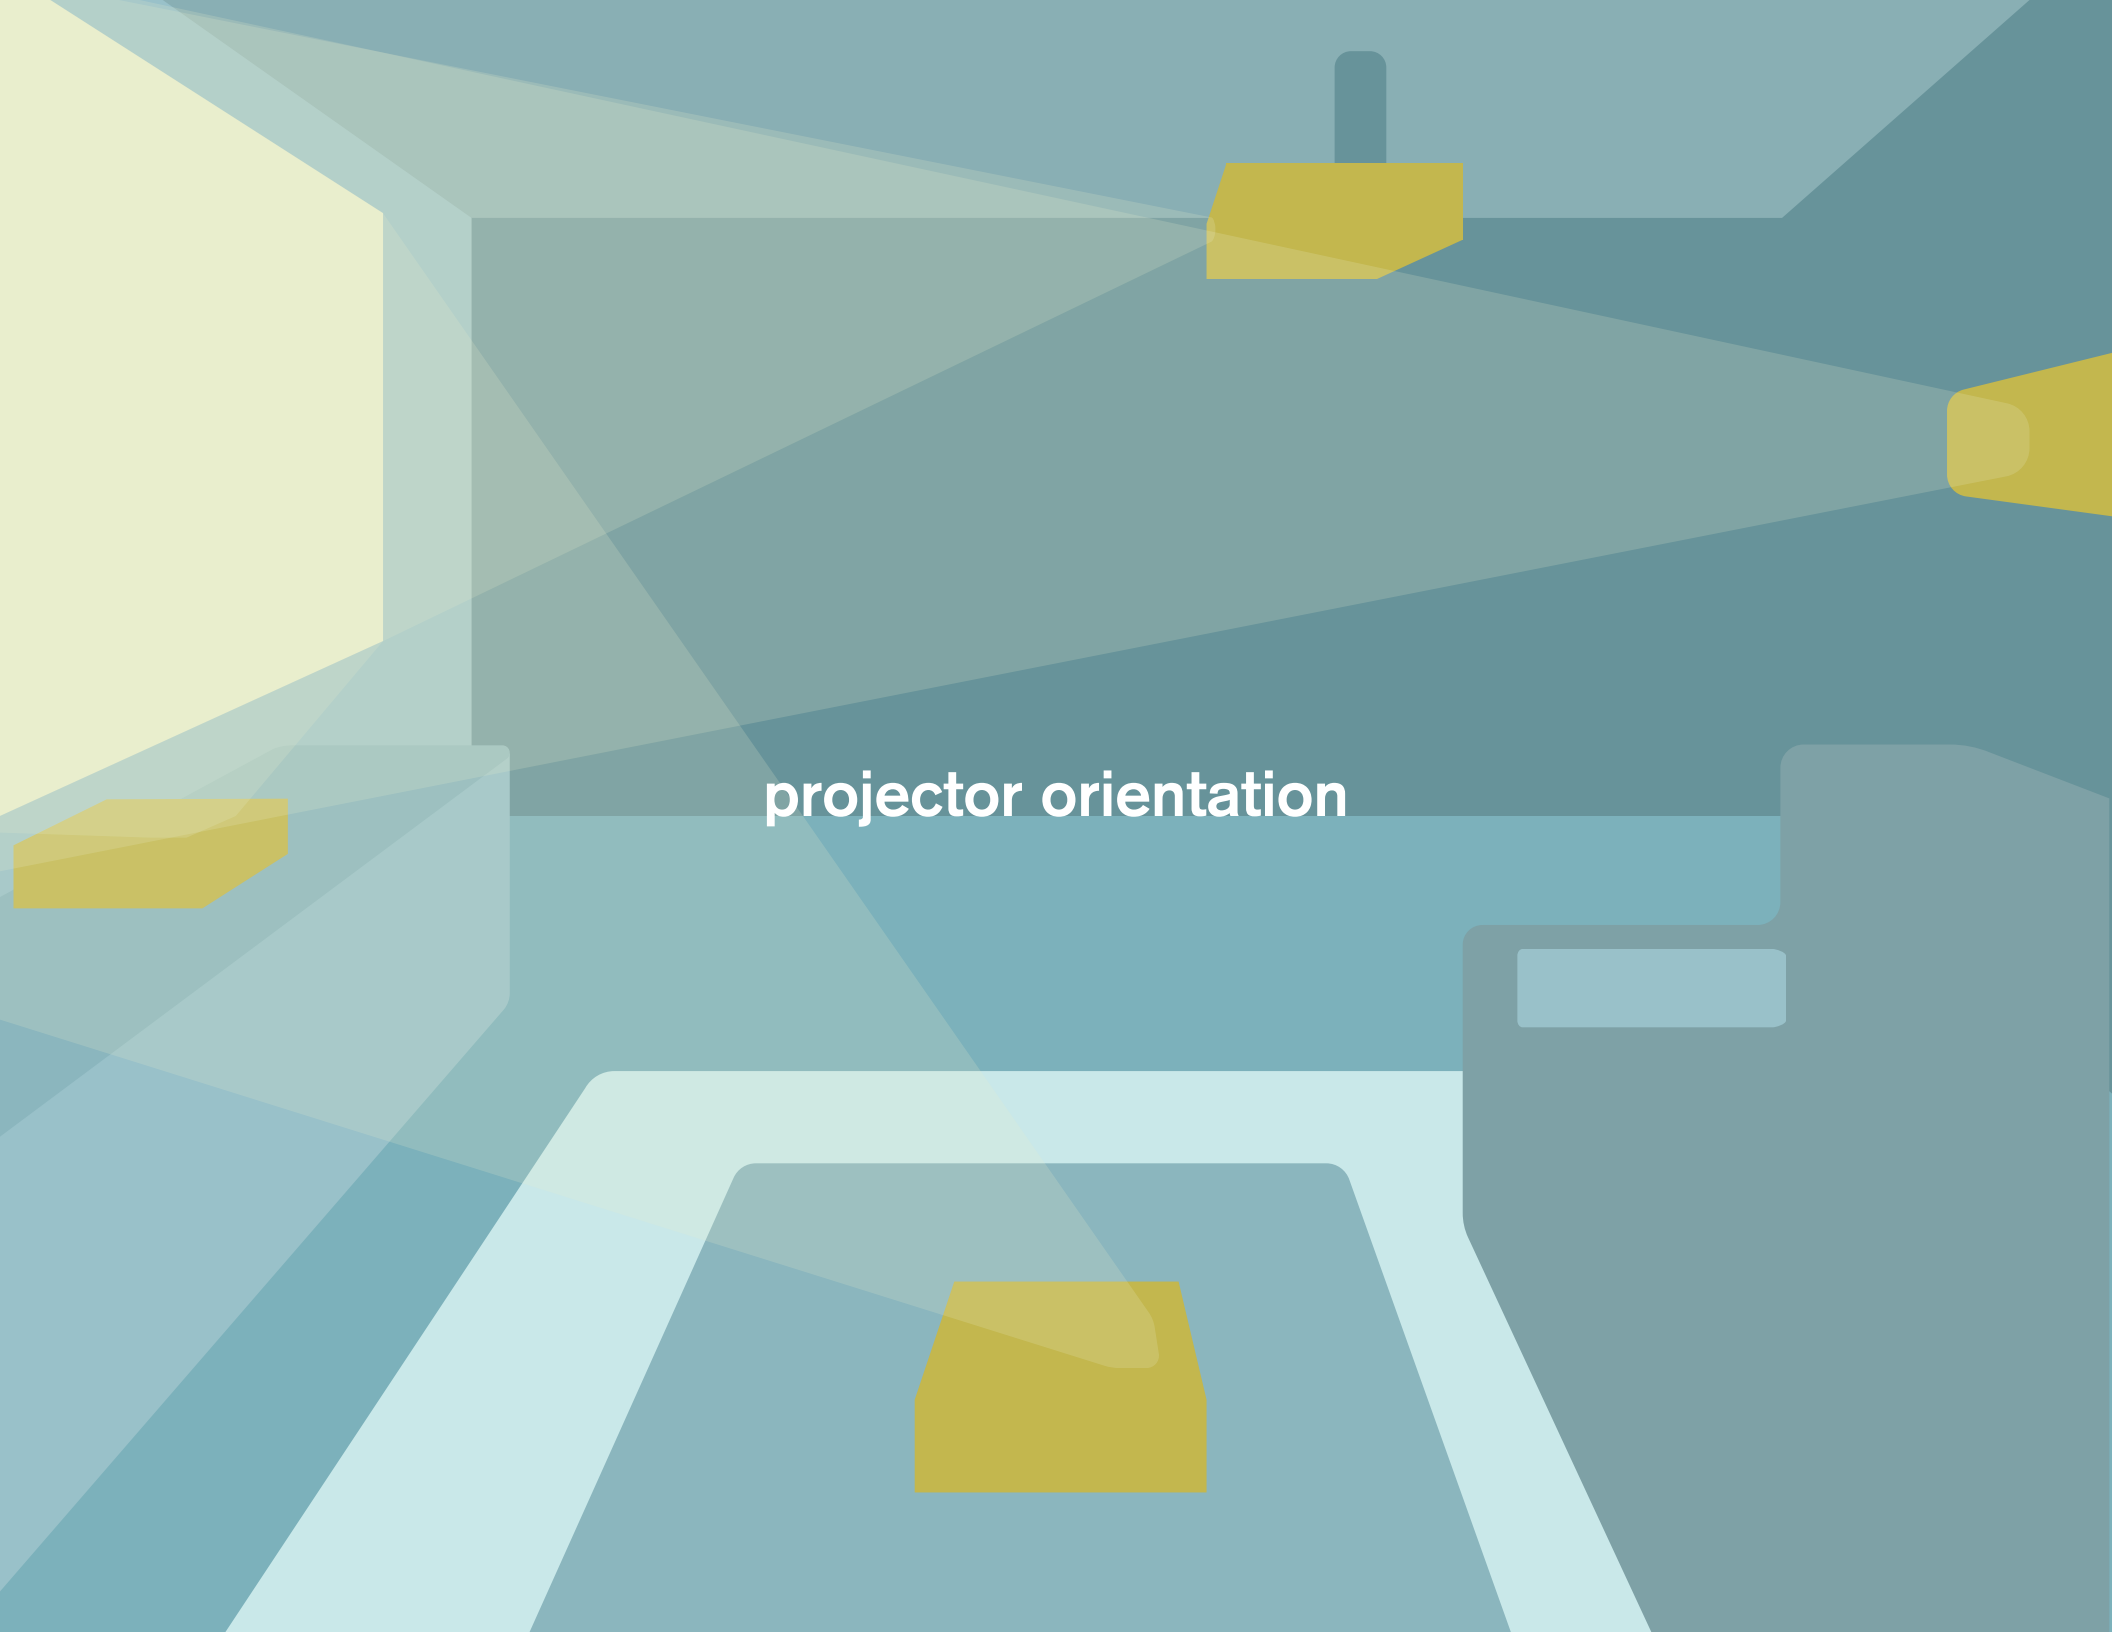

REEL

entertainment console

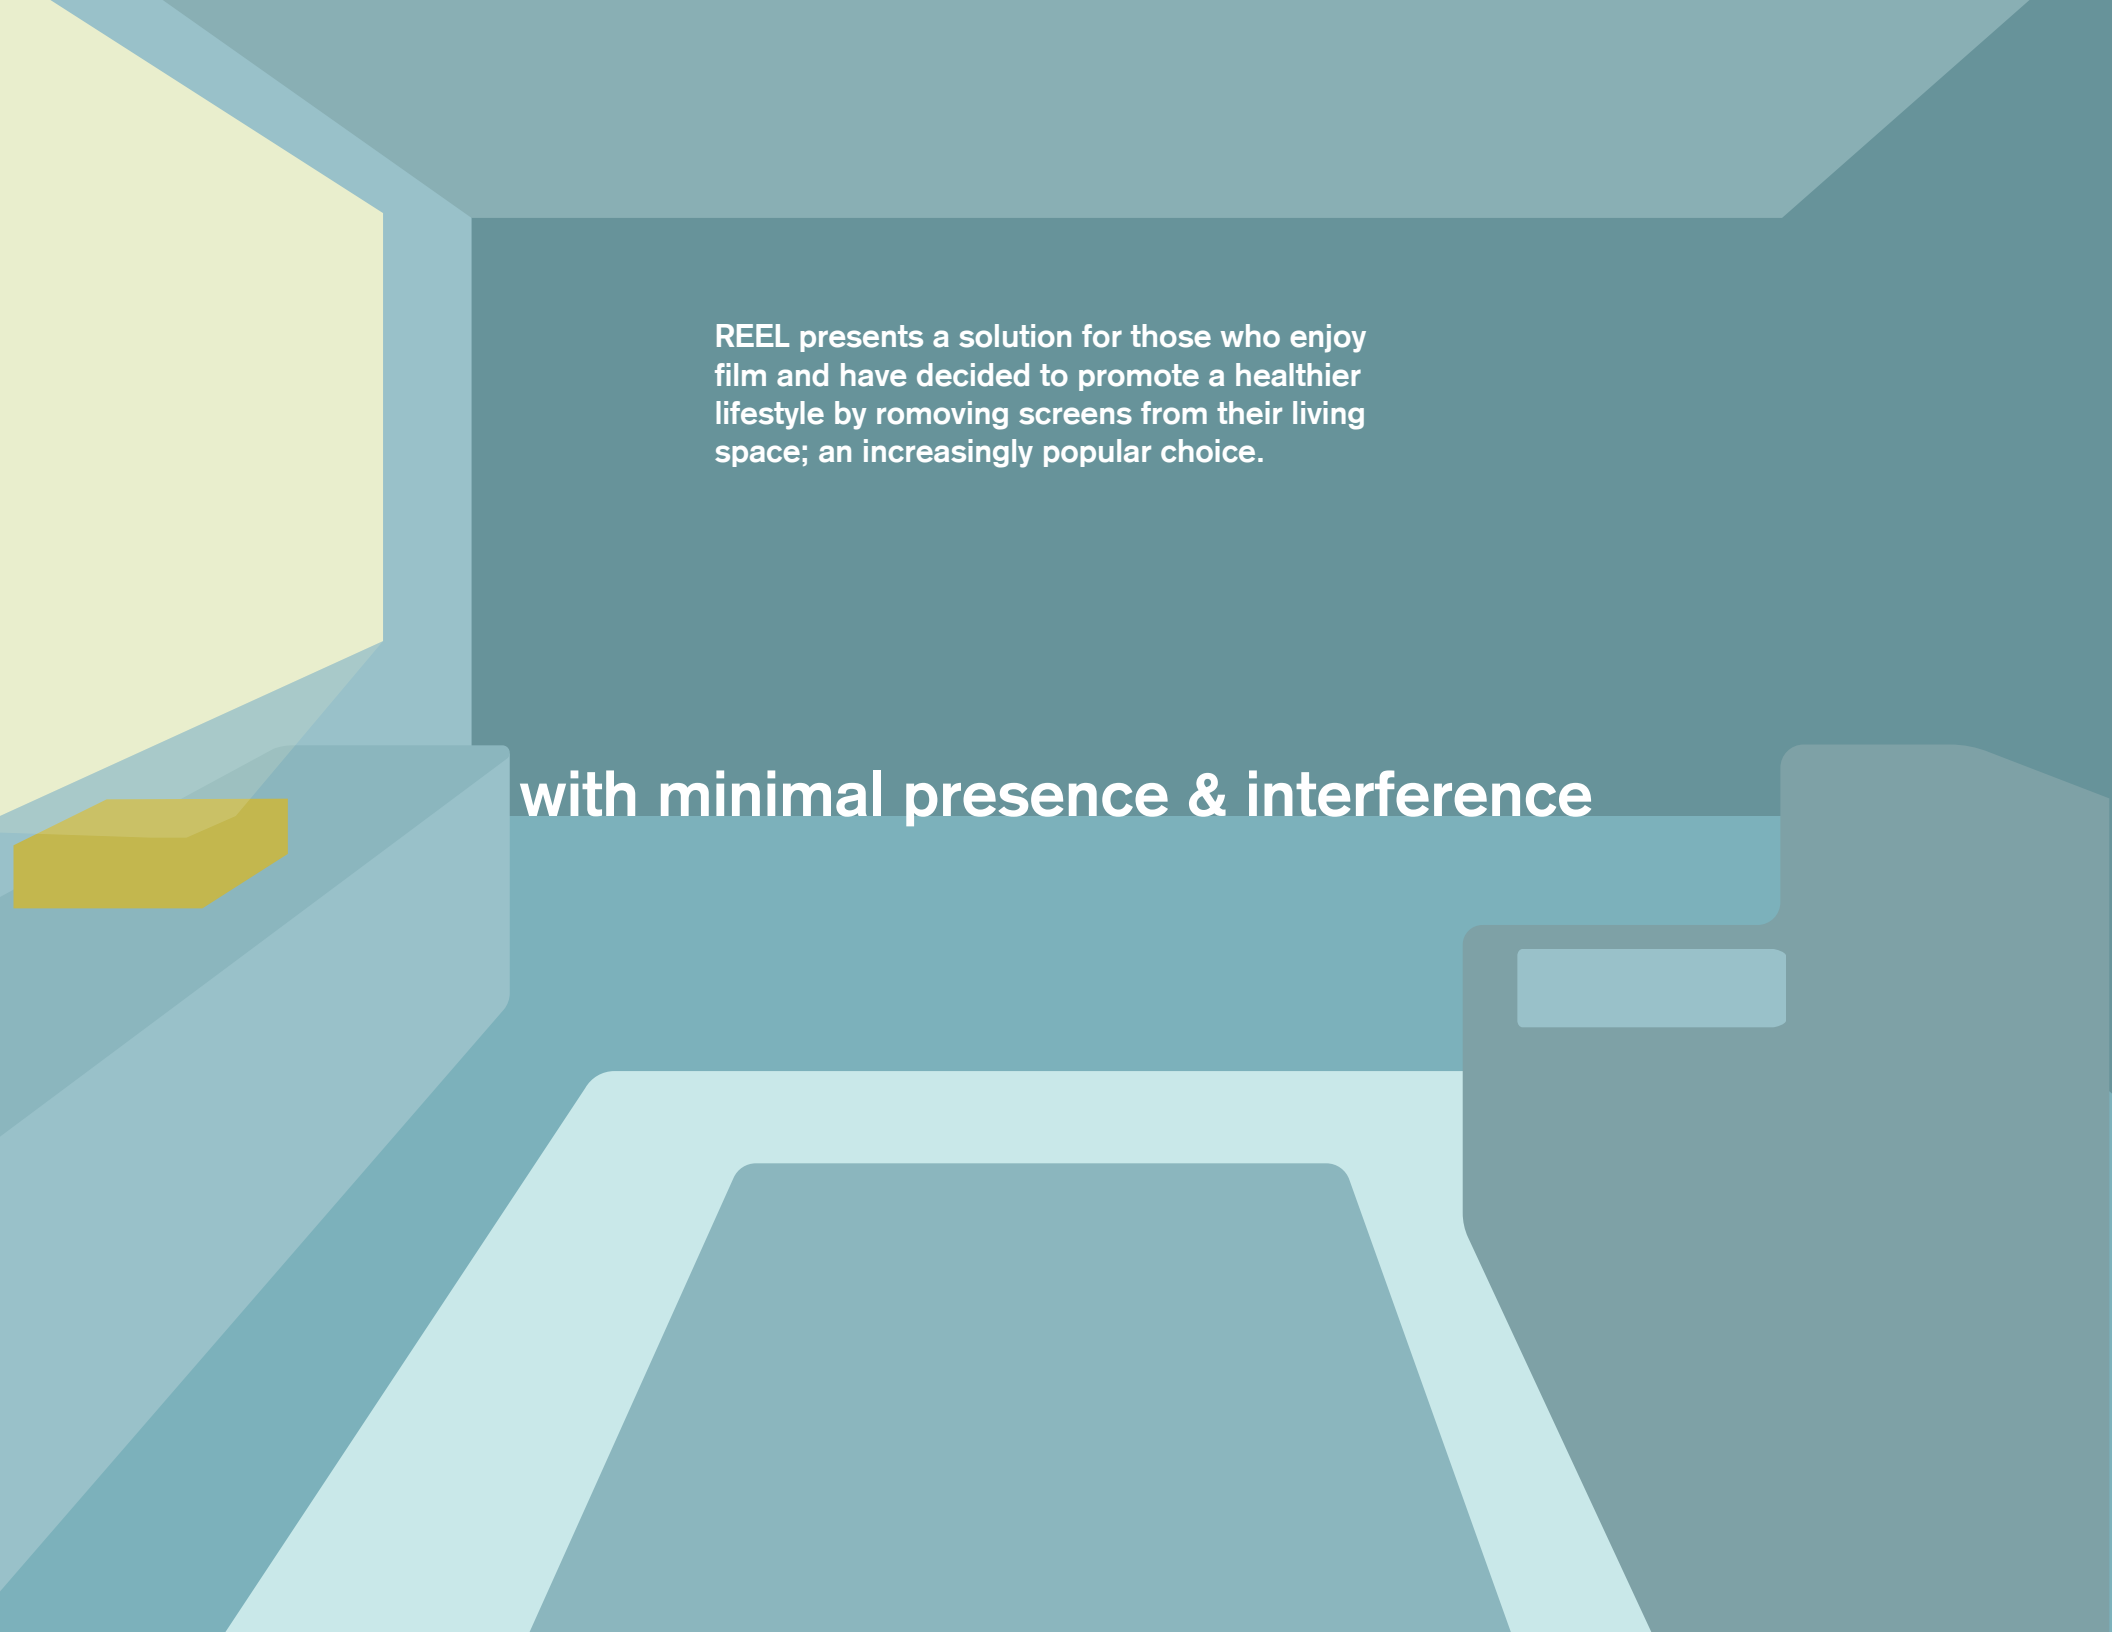

An abstract geometric scene with various blue and yellow shapes. A large yellow block is on the left. A blue block with a vertical post is at the top center. A yellow block is on the right. A yellow block is on the bottom center. A blue block is on the bottom right. A light blue block is on the bottom left. A yellow beam of light originates from the right and points towards the top center. A blue beam of light originates from the top center and points towards the bottom center. The text "projector orientation" is centered in the middle of the image.

projector orientation

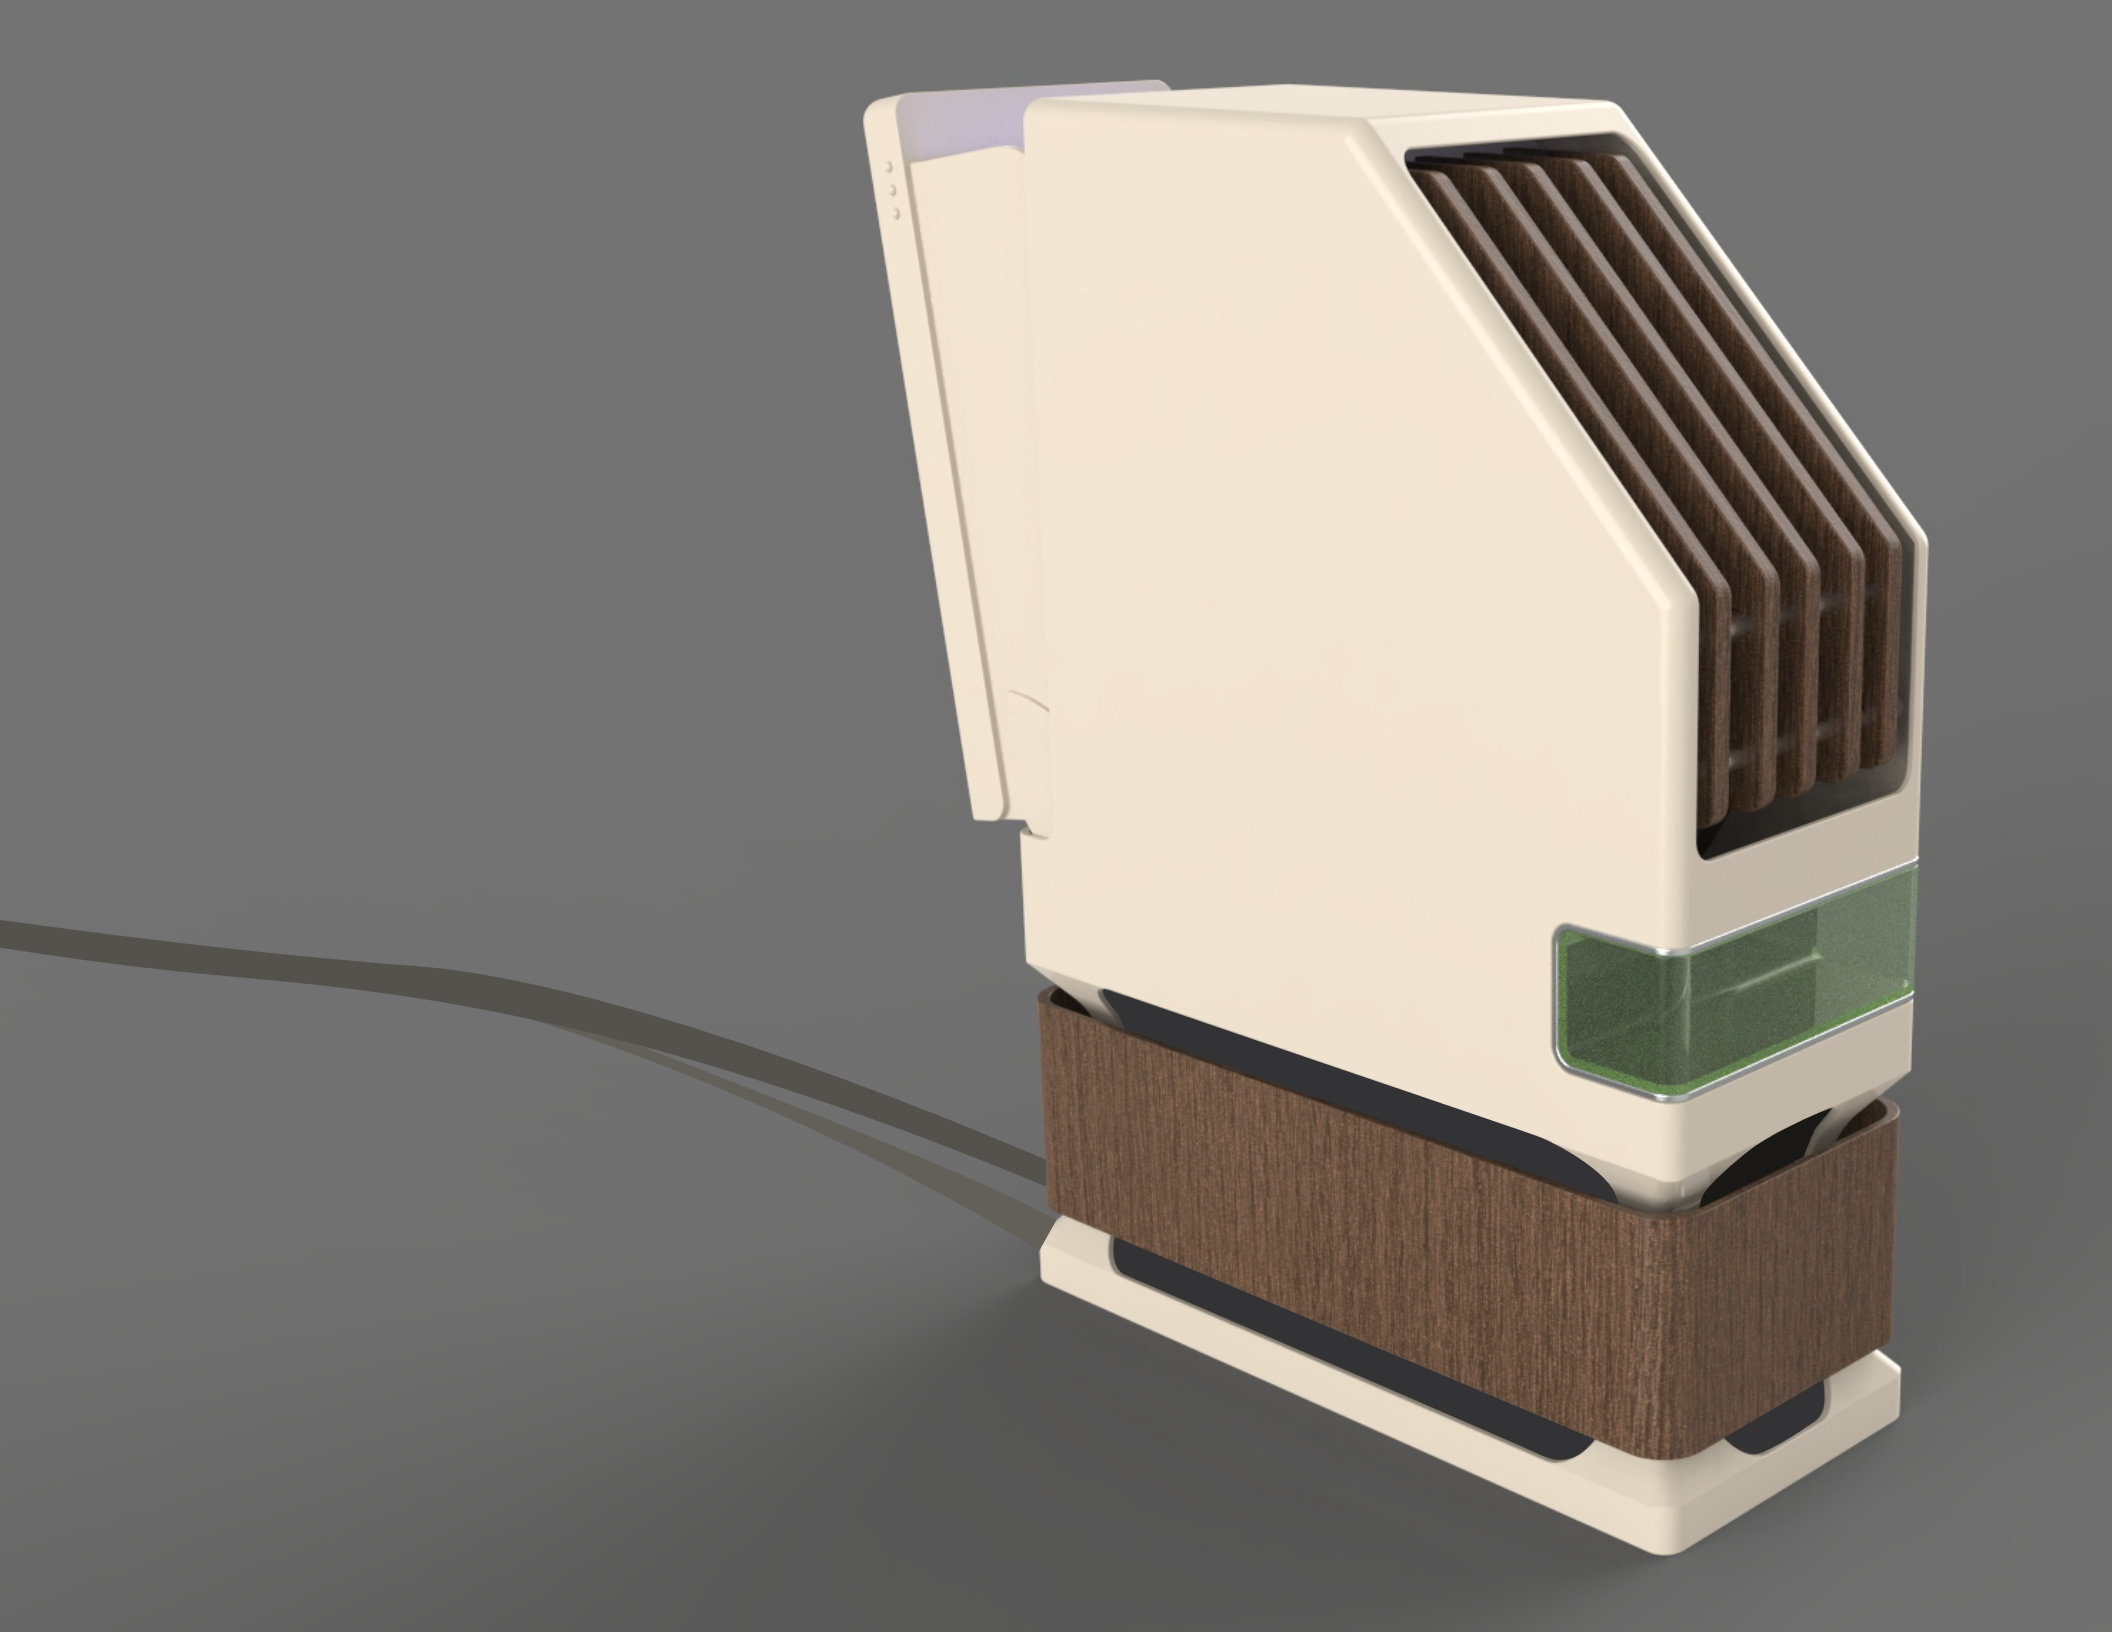

REEL presents a solution for those who enjoy film and have decided to promote a healthier lifestyle by removing screens from their living space; an increasingly popular choice.

with minimal presence & interference
